pear to us, in conflict with the teachings of a just political economy. Astronomers inform us, that there are spots on the sun, and therefore it can be no represent to a merely human intelligence, that its disc is not entirely free from opaque motes. Borne away by the current of a great thought, obviously rue in all its principal relations, Mr. McCulloch is led into a companisory treatment of certain principles, in order that they might contribute to the present of the general idea. We offer for accriting in the present article, an example of this apparent contraction of currency he says:

"It is a well established fact, which has not contraction of currency he says:

"It is a well established fact, which has not contraction of currency he says:

"It is a well established fact, which has not contraction of currency he says:

"It is a well established fact, which has not contraction of currency he says:

"It is a well established fact, which has not contraction of currency he says:

"It is a well established fact, which has not contraction of all intelligent observements."

"It is a well established fact, which has not contraction of currency he says:
